

Message from TRI

“We would like to thank all the investigating sites for their continued hard work and interest in the Garfield-AF registry. Your support and determination towards the study is highly valued.

The current operational priorities for the project are Data lock of the major milestones, follow-up extensions and resolution of any data queries raised. Your site managers will be closely working with you to move forward with these activities.”

Data lock Milestones for July

In order to perform analysis on the most accurate and up-to-date data we encourage all our sites to lock the following milestones by the end of July. Locking of the data provides a confirmation that all the data entered is accurate, complete and can be used for analysis.

- Cohort 1 – All Follow-Ups beyond Month 36
- Cohort 2 – All Follow-ups beyond Month 36
- Cohort 3 – All Follow-ups beyond Month 36
- Cohort 4 – Month 24
- Cohort 5 – Month 12

If any of your patients are eligible for the above mentioned milestone please complete and lock this data at your earliest possible convenience.

Please see below the current global data lock status:

Milestones	Cohort 1	Cohort 2	Cohort 3	Cohort 4	Cohort 5
Baseline	99.98%	99.90%	99.71%	99.81%	95.54%
Month 12	99.85%	99.79%	99.71%	99.60%	76.57%
Month 24	99.77%	99.79%	99.22%	71.66%	
Month 36	82.09%	93.09%	78.32%		
Month 48	80.15%	72.26%	47.3%		
Month 60	76.54%	66.91%			

Our aim is to achieve 99% of data lock by the end of July.

Follow up Extension

We encourage all our investigators to enter patients in the extended patient follow-up beyond 24 months. This long term follow-up data will help TRI analyse outcomes in patients and change in treatment practices over time.

The data entry for all events are significantly reduced as only one yearly follow-up is required. The investigator site will be financially compensated annually for this.

So far we have 3,925 patients entered in the follow-up extension phase.

Please get in touch with your site managers if you are unsure about how to enter patients into follow up extension. They will be able to provide you with the instruction document.

Anti-Clot Treatment Scale Questionnaire

Re-supply of ACTS questionnaires must be requested when your stock level falls to 5 booklets or less. To order additional questionnaires at the site please contact your site managers. Expect 2-3 weeks for delivery.

Garfield Website

Our NEW Garfield-AF Registry website, serves as a key HUB with information for the public, media as well as the Garfield-AF community. Take time to explore the website which offers a range of engaging and valuable content for Community members.

To view resources, we are delighted to provide you with a log-in access to the community page of the website:

Website: <http://www.garfieldregistry.org/>

Community page: <http://af.garfieldregistry.org/community>

Username – Your email address (as originally registered with the TRI website)

Password – garpass01

Once you are logged in you will be prompted to change your password. If you have any technical issues, please contact us and we will address the issue as quickly as possible.

Contacts

For any support you need please contact your site managers. If you have any suggestions for ways in which TRI can further support you, please contact us at the email below: TRIGarfieldsupport@quintilescontact.com

In case of specific issue or any suggestions, please contact TRI Garfield-AF project management team directly at the email: Garfield@tri-london.ac.uk
